ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each plastic packaging.

MY OPINION

Companies should voluntarily give up plastic packaging.

WHY?

- Bans are wrong. The EU is not the plastic police.
- We all need to change our behavior. We should stop buying fruit and vegetables in plastic boxes. Then the companies will think of other packaging - without coercion and penalties.

VOLUNTARY INFO

Get to know me better!

Who am I?

I am 42 years old and live with my family in a big house in Alicante (Spain). I used to work for a bank there.

Why am I in politics?

Many in politics understand too little about economics. That is dangerous. That's how bad decisions are made and jobs are lost. I want to change that.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is. But I am not alone!
Everyone in the conservative group has the same goals:
The preservation of traditions and a good economic policy.

This happens step by step:

1 Meet in your country group

Meet the other members of Parliament from Spain Explain your positions.

2 Meet in your parliamentary group

Agree on common goals in your parliamentary group.

3 Committee meeting

Represent your position in the Environment Committee.

4 Meet in your parliamentary group

Get an update on how negotiations are going.

5 Committee meeting

Try one last time to get your positions accepted.

FINALE Plenary

Vote in plenary with all the other 719 MEPs on the new EU law.

ARTICLE 2: When should the law take effect?

immediately | MY OPINION **in 2 years** | in 10 years

WHY?

- Even voluntarily not using plastic packaging takes time. So far, there is no cheap solution for packaging tomatoes or herbs without plastic.
- New packaging must first be developed.
