ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay 1 € extra for each plastic packaging.

Companies should voluntarily give up plastic packaging.

WHY?

- Every person should decide for themselves whether they want to buy fruit and vegetables in plastic packaging or not. Most people reject bans.
- The plastic industry employs 1.5 million people across Europe. Their jobs are at risk if a plastic ban comes into effect now.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 35 years old and I come from Paris.
I had a software development company there.

Why am I in politics?

The economy must be supported in order to protect jobs and drive forward the green transition. You are committed to this.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is, but I am not alone! Everyone from the conservative group has the same goals: The preservation of traditions and a good economic policy.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- This is a good middle path. Companies will have time to invent new packaging. At the same time, we won't have to wait long for things to change.
