ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each plastic packaging.

Companies should voluntarily give up plastic packaging.

WHY?

- Europe would send a signal to the whole world with the ban.
- European companies could become frontrunners for new, plastic-free packaging. These can be sold all over the world. This would create new jobs.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 31 years old and I come from Constanta (Romania).
Before I was elected to the European Parliament, I worked for a bank.

Why am I in politics?

The economy is completely out of control. Money is more important than nature for many people today. That has to change. That's why I'm in Parliament.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is. But I am not alone! Everyone from the Socialist Group has common goals: Social justice and environmental protection.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- Companies and the economy have had many years to solve the problem.
- However, nothing has been achieved. That is why there should be a ban immediately.
