ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay 1 € extra for each plastic packaging.

Companies should voluntarily give up plastic packaging.

WHY?

- Europe would send a signal to the whole world with the ban.
- European companies could become frontrunners for new, plastic-free packaging. These can be sold all over the world. This would create new jobs.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 28 years old and come from Lille.
After my law degree, I went straight into politics.

Why am I in politics?

The economy is completely out of control.
Money is more important than humanity for many people today.
That has to change. That's what I'm sitting in Parliament for.

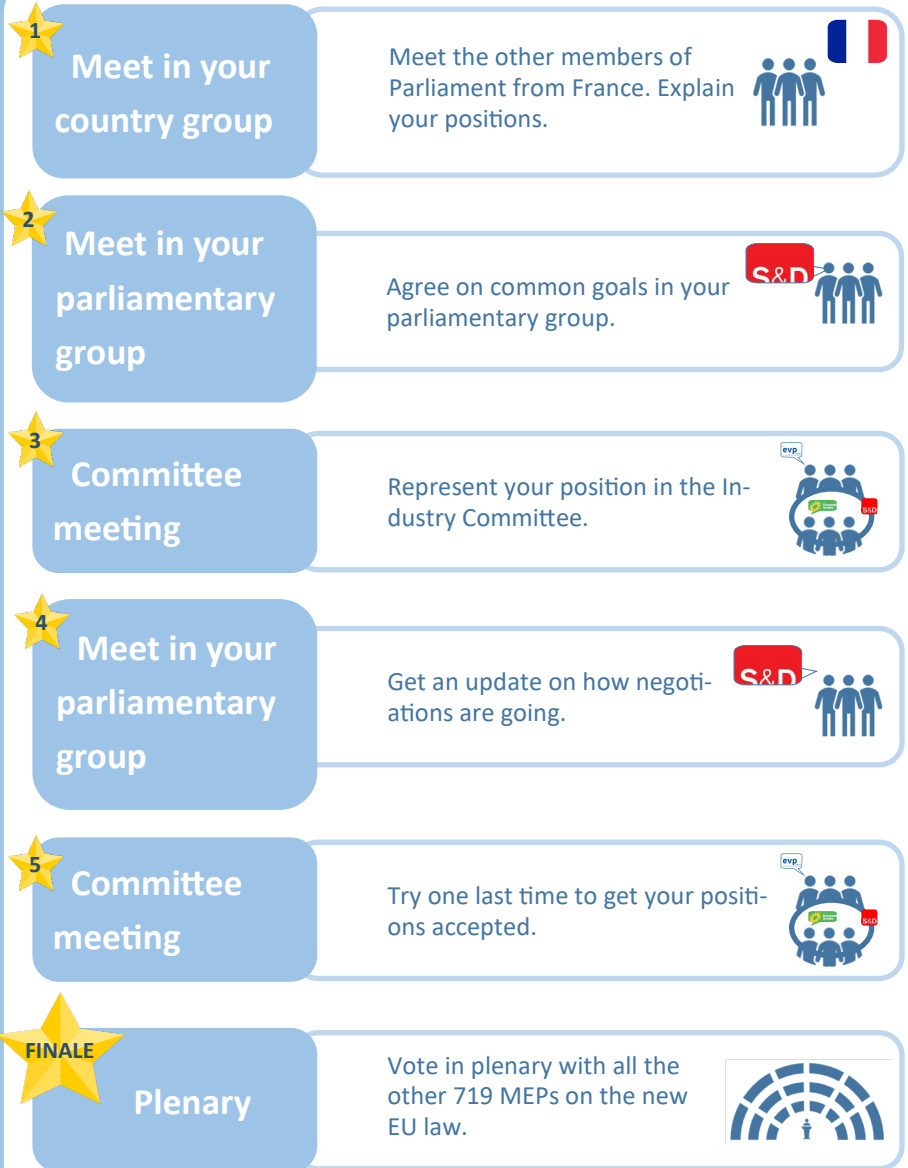

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It is. But I am not alone!
Everyone from the Socialist Group has common goals:
Social justice and environmental protection.

This happens step by step:

ARTICLE 2: When should the law take effect?

MY OPINION

immediately **In 2 years** **in 10 years**

WHY?

- Industry and companies have had many years to solve the problem.
- Yet, nothing has been done. This is why we should immediately ban plastic packaging
