ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each
plastic packaging.

**Companies should voluntarily
give up plastic packaging.**

WHY?

- Bans are wrong. The EU is not the plastic police.
- We all need to change our behaviour. We should no longer buy fruit or vegetables in plastic boxes. Then companies will create other packaging - without any coercion or penalties.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 50 years old and live with my husband in a big house in Sathmar (Romania).
I used to work there as a teacher.

Why am I in politics?

Many in politics understand too little about economics. That is dangerous.
Bad decisions are made and jobs are lost. I want to change that.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others
about what new laws there should be.

Sounds exhausting?

It really is, but I am not alone! Everyone in the Conservative Group has the same
goals: The preservation of traditions and a good economic policy.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- Even a voluntary renunciation takes time. So far, there is no cheap solution for packaging tomatoes or herbs without plastic.
- New packaging must first be developed.
