ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each
plastic packaging.

**Companies should voluntarily
give up plastic packaging.**

WHY?

- I hate it when the EU issues bans. People should be free.
- In the supermarket they offer fruit and vegetables with and without plastic. People decide for themselves whether the plastic bothers them or not.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 27 years old and live in Madrid (Spain). Before I was elected to the European Parliament, I worked in a glassblowing factory.

Why am I in politics?

The EU has too many rules. The citizens of Spain are suffering as a result. I am committed to ensuring that the EU intervenes less in Spanish politics.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is. But someone has to do it. Besides, I am not alone! Everyone in the anti-EU faction has a common goal: pushing back against the EU so that countries in Europe can be freer again and the EU does not dictate everything anymore.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- This is a good middle way. Companies have time to invent new packaging. At the same time, we don't wait long for things to change.
- 10 years is quite long—if the companies are giving up plastic voluntarily anyways, the law can apply earlier.
