ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

**People should pay €1 extra
for each plastic packaging.**

Companies should voluntarily give up
plastic packaging.

WHY?

- There are already 142 million tonnes of plastic waste floating in the oceans. That's how much, plastic waste Germany produces in 27 years!
- Of course we need to reduce plastic use. But consumers should not be burdened unnecessarily. Companies should do without plastic voluntarily.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 58 years old and come from Mannheim.
I used to work for a large German company. I have a son and two grandchildren.

Why am I in politics?

For people to be well off, they need a job.
But there are only jobs if the economy is doing well. That's what I'm fighting for!
The EU seems to me to be more of a problem than a help. That's why I'm campaigning for change at European level.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others
about what new laws there should be.

Sounds exhausting?

It really is. But someone has to do it. Besides, I am not alone! Everyone in the
anti-EU faction has a common goal:
pushing back against the EU so that countries in Europe can be freer again and
the EU does not dictate everything anymore.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- This is a good middle way. Companies have time to invent new packaging. At the same time, we don't wait long for things to change.
