ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

**People should pay €1 extra
for each plastic packaging.**

Companies should voluntarily give up
plastic packaging.

WHY?

- Each person can decide for themselves whether or not to buy fruit and vegetables in plastic packaging. There is no compulsion, but freedom.
- Tomatoes in plastic boxes will be more expensive. Therefore, more people will buy loose tomatoes. So, the law helps to avoid plastic.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 76 years old and come from Timisoara in Romania.
I have a road construction company there.

Why am I in politics?

The economy in Romania used to be bad. The supermarket shelves were often empty and many people had bad jobs. I want that to never happen again.
That's what I'm fighting for.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is, but I am not alone! Everyone from the conservative group has the same goals: The preservation of traditions and a good economic policy.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- Developing new packaging without plastic takes time. Otherwise the packaging companies will go bankrupt and the employees will be unemployed.
