### ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each plastic packaging.

**Companies should voluntarily give up plastic packaging.**

#### WHY?

- A ban will kill the plastic industry. Companies that produce plastic packaging will have to close down. People will become unemployed.
- In Spain we don't have a problem with plastic. People don't want a law.

## Get to know me better!

### Who am I?

I have 2 children and 7 grandchildren. I used to have a small company near Barcelona. Since I've been in the European Parliament, I've been fighting for Spain - and against the EU.

### Why am I in politics?

I want my country out of the EU. Spain is overwhelmed with useless rules. But we are a proud people and we can make our own rules. I am fighting for my country to leave the EU again.

### What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

### Sounds exhausting?

It really is. But someone has to do it. Besides, I am not alone! Everyone in the anti-EU faction has a common goal: pushing back against the EU so that countries in Europe can be freer again and the EU does not dictate everything anymore.

## This happens step by step:

## ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

### WHY?

- A voluntary regulation in 10 years will hurt the economy the least. At least it gives companies time to change.
- Even better would be no law at all.
