ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each
plastic packaging.

**Companies should voluntarily
give up plastic packaging.**

WHY?

- I hate it when the EU issues bans. People should be free.
- In the supermarket they offer fruit and vegetables with and without plastic. People decide for themselves whether the plastic bothers them or not.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 48 years old and I come from Constanta (Romania). I have 4 children. The youngest has just turned 5. Before I was elected to the European Parliament, I worked for a newspaper.

Why am I in politics?

I want the EU to disappear. Romania is a proud country. The people here should decide their own future. All laws should once again be made in Romania—or at least a lot less by the EU..

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is. But someone has to do it. Besides, I am not alone! Everyone in the anti-EU faction has a common goal: pushing back against the EU so that countries in Europe can be freer again and the EU does not dictate everything anymore.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- The best thing would be no new rules at all. The later, the better.
- If plastic is so bad, it will disappear by itself. People will just stop buying it at some point.
