ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each
plastic packaging.

**Companies should voluntarily
give up plastic packaging.**

WHY?

- Companies should be free to decide how they package fruit and vegetables. The most important thing is that fruit or vegetables are not crushed.
- France grows a lot of fruit that is sold in the EU. Packing fruit and vegetables - that gives many people in France a job.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 63 years old. I live near Marseille (France).
I live there with my wife and our dog.

Why am I in politics?

Politics should interfere as little as possible in the economy.
Free trade, few laws, no bans - that's what I stand for.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others
about what new laws there should be.

Sounds exhausting?

It really is. But it is worth it. Besides, I am not alone!
Everyone from the liberal group has the same goals:
Freedom for the people and no unnecessary rules for the economy.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- In the next 2 years we could explain to people that un-packaged food is better for the environment.
- Then they will voluntarily buy less plastic before the new law takes effect.
