### ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

**People should pay €1 extra  
for each plastic packaging.**

Companies should voluntarily give up  
plastic packaging.

### WHY?

- A fee is supposed to get people used to no longer buying fruit and vegetables in plastic packaging.
- Those who work hard and earn a lot of money can still afford the luxury of plastic packaging.
- In the end, everyone can choose for themselves.

## Get to know me better!

### Who am I?

I am 43 years old and come from Bucharest, Romania.  
Before I went into politics, I worked for a big company.

### Why am I in politics?

Politics should interfere as little as possible in the economy.  
Free trade, few laws, no bans - that's what I stand for.

### What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others  
about what new laws there should be.

### Sounds exhausting?

It really is. But it is worth it. Besides, I am not alone!  
Everyone from the liberal group has the same goals: Freedom for the people and  
no unnecessary rules for the economy.

## This happens step by step:

## ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

### WHY?

- Companies need time to change. New packaging has to be invented. New machines and new factories are needed.
- It is too expensive to change in the short term. The companies would go bankrupt.
