**ARTICLE 1:** How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each  
plastic packaging.

**Companies should voluntarily  
give up plastic packaging.**

### WHY?

- Companies should be free to decide how they package fruit and vegetables. The most important thing is that fruit or vegetables are not crushed.
- Spain grows a lot of fruit that is sold in the EU. Packing fruit and vegetables - this gives many people in Spain a job.

## Get to know me better!

### Who am I?

I am 42 years old, and I have 2 children and 3 grandchildren.  
I live near Barcelona (Spain) and used to work in a café.

### Why am I in politics?

Politics should interfere as little as possible in the economy.  
Free trade, few laws, no bans - that's what I stand for.

### What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others  
about what new laws there should be.

### Sounds exhausting?

It really is. But it is worth it. Besides, I am not alone!  
Everyone from the liberal group has the same goals:  
Freedom for the people and no unnecessary rules for the economy.

## This happens step by step:

## ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

### WHY?

- In the next 2 years we could explain to people that un-packaged food is better for the environment.
- Then they will voluntarily buy less plastic before the new law applies.
