ARTICLE 1: How should plastic packaging of fruit and vegetables be dealt with in the EU?

It should be banned.

People should pay €1 extra for each plastic packaging.

Companies should voluntarily give up plastic packaging.

WHY?

- Every second 700 kg of plastic waste ends up in the sea. If we ban plastic packaging for fruit and vegetables, things could change quickly.
- Bans are the fastest and safest way.

MORE REASONS/NOTES:

Get to know me better!

Who am I?

I am 37 years old and live in Brussels, but I am originally from Poland. Before I was elected to the European Parliament, I was a teacher.

Why am I in politics?

The EU is a great achievement for me. Nevertheless, there are many areas where we do not do enough. For example, the environment. I do politics so that important issues are addressed.

What is my job?

I am a Member of the European Parliament. There I negotiate with 719 others about what new laws there should be.

Sounds exhausting?

It really is. But I am not alone! Everyone from the Socialist Group has common goals: Social justice and environmental protection.

This happens step by step:

ARTICLE 2: When should the law take effect?

immediately

in 2 years

in 10 years

WHY?

- Of course, you can't introduce a ban on plastic packaging overnight.
- But you can't wait forever either, otherwise it will be too late for the environment.
