

Why?:
People like to do things voluntarily. No one wants to be forced. The producers of fruit and vegetables will do without plastic themselves if no one buys packaged fruit and vegetables any more.

Must or can?

can

Why?:
If people want to continue buying fruit and vegetables in plastic packaging, we should not stop them. That is for each person to decide.

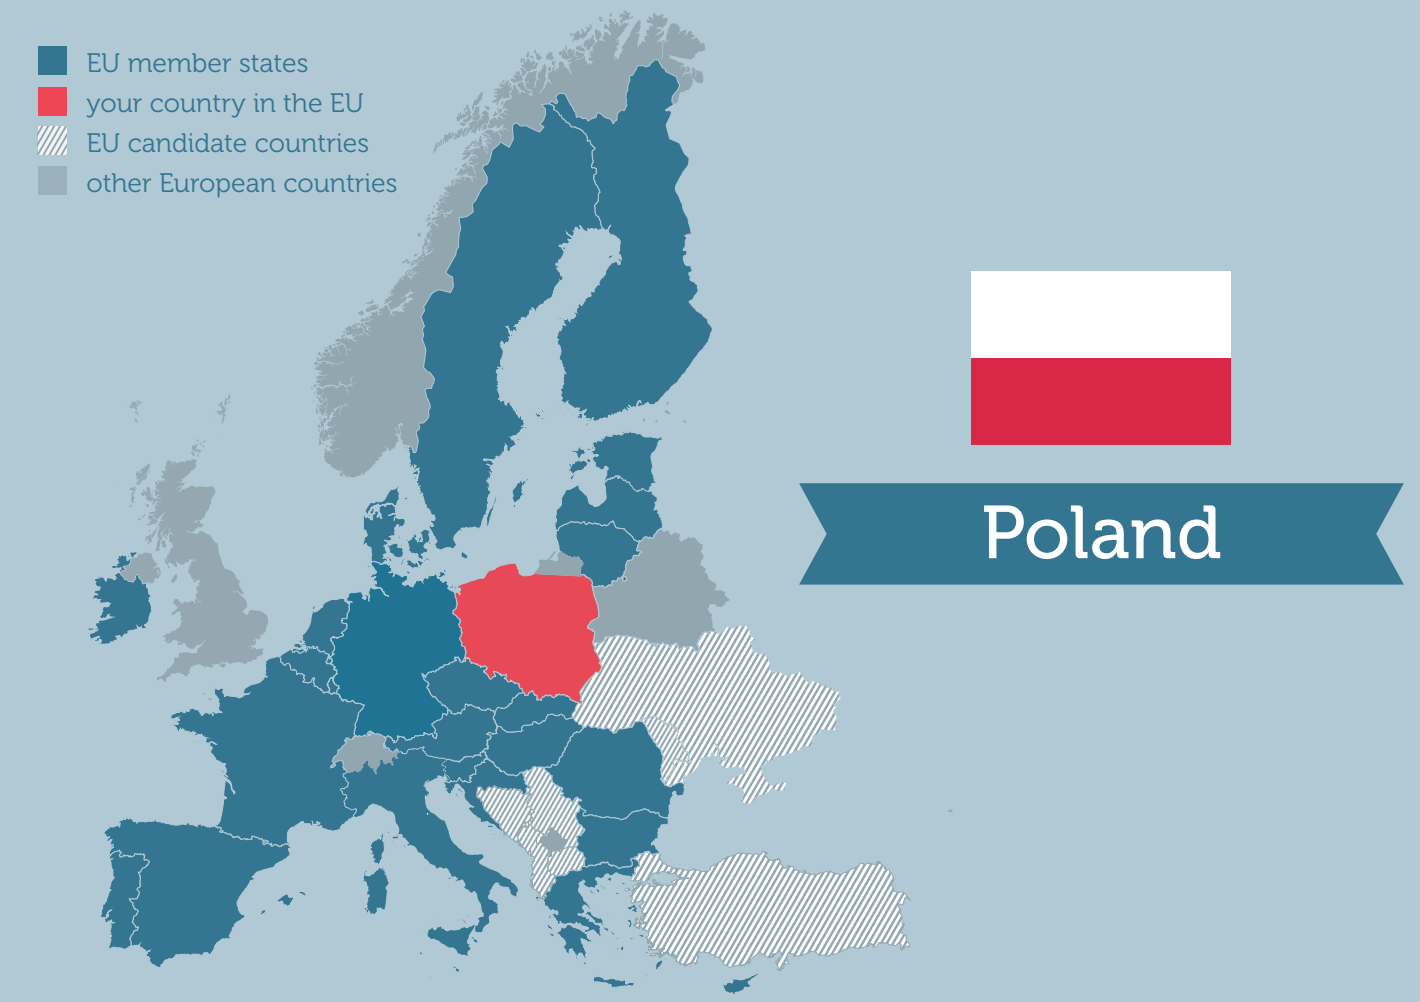

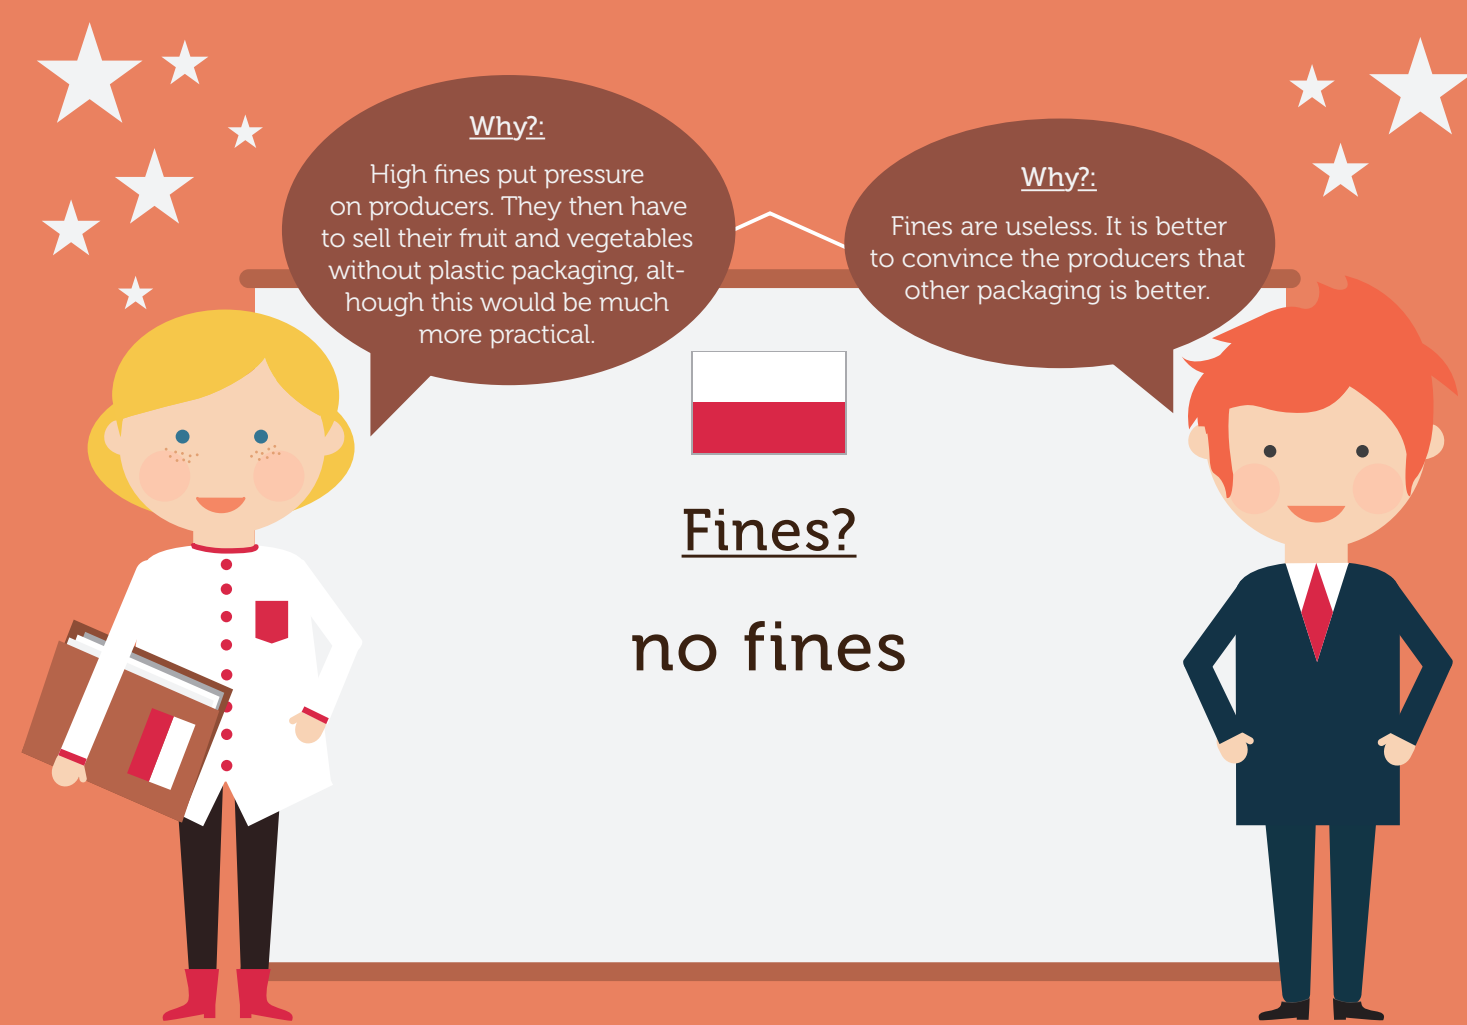

Why?:
High fines put pressure on producers. They then have to sell their fruit and vegetables without plastic packaging, although this would be much more practical.

Fines?

no fines

Why?:
Fines are useless. It is better to convince the producers that other packaging is better.

Your country in the EU

Poland

EU MEMBER SINCE: 2004

WASTE PER PERSON: medium

National plastic ban

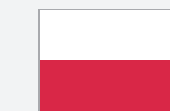

EXISTS IN THE COUNTRY: no

Why?:

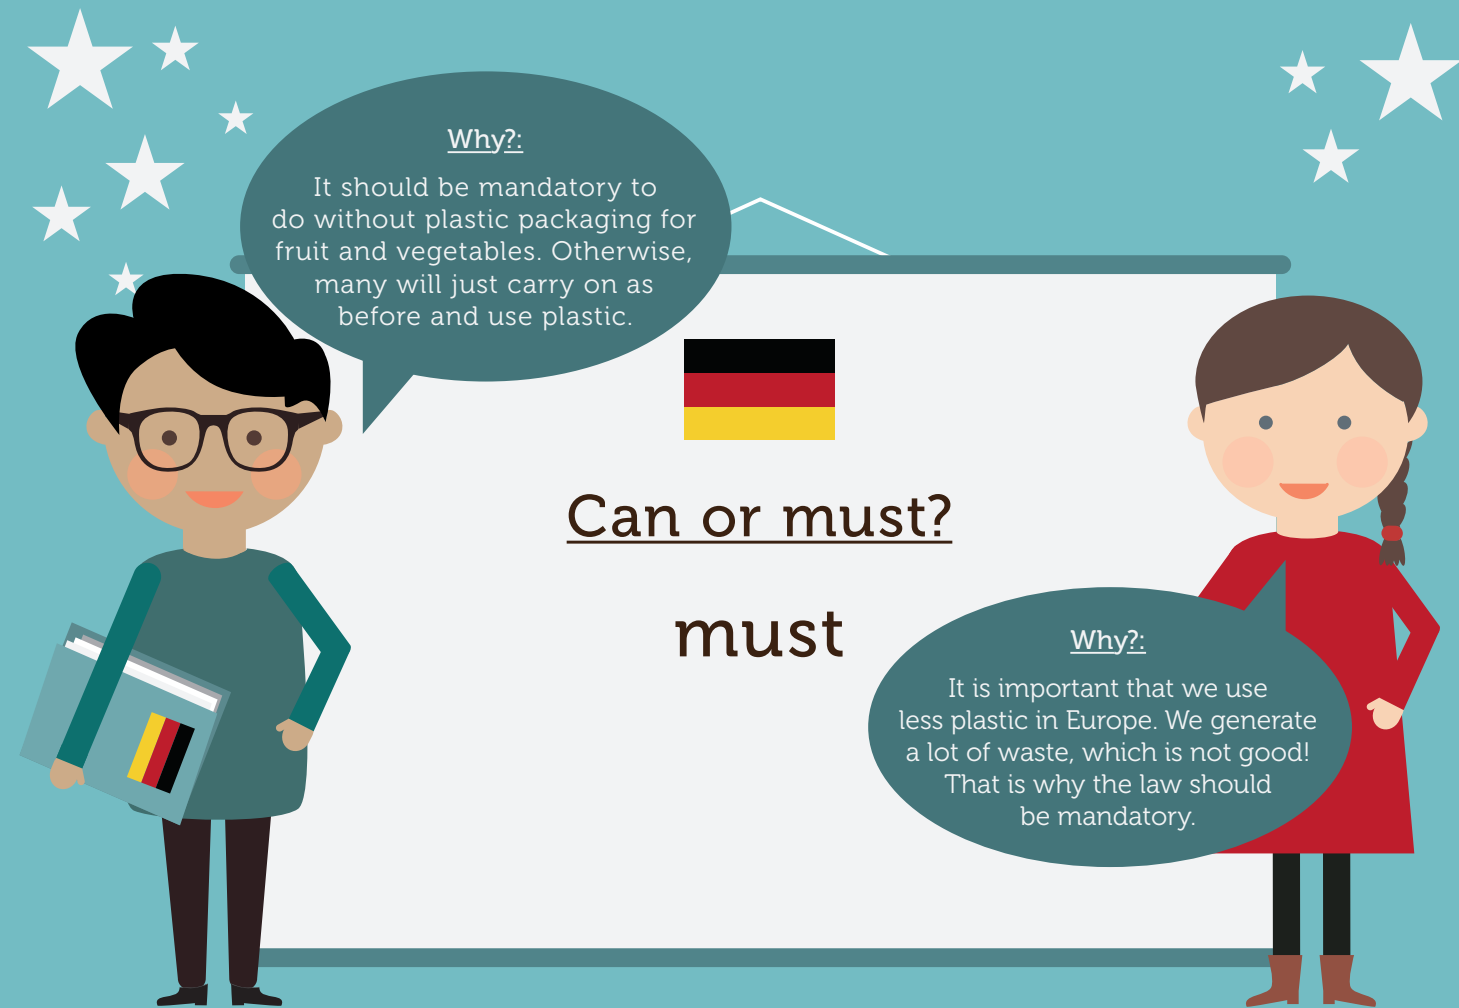

We do not think it is good to ban something. Some people want to buy their fruit and vegetables in plastic packaging. It is convenient for transporting the groceries, for example.

Why?:

In Poland, there are many people who produce plastic packaging. If we ban plastic packaging for fruit and vegetables, they might lose their jobs.

When?
never

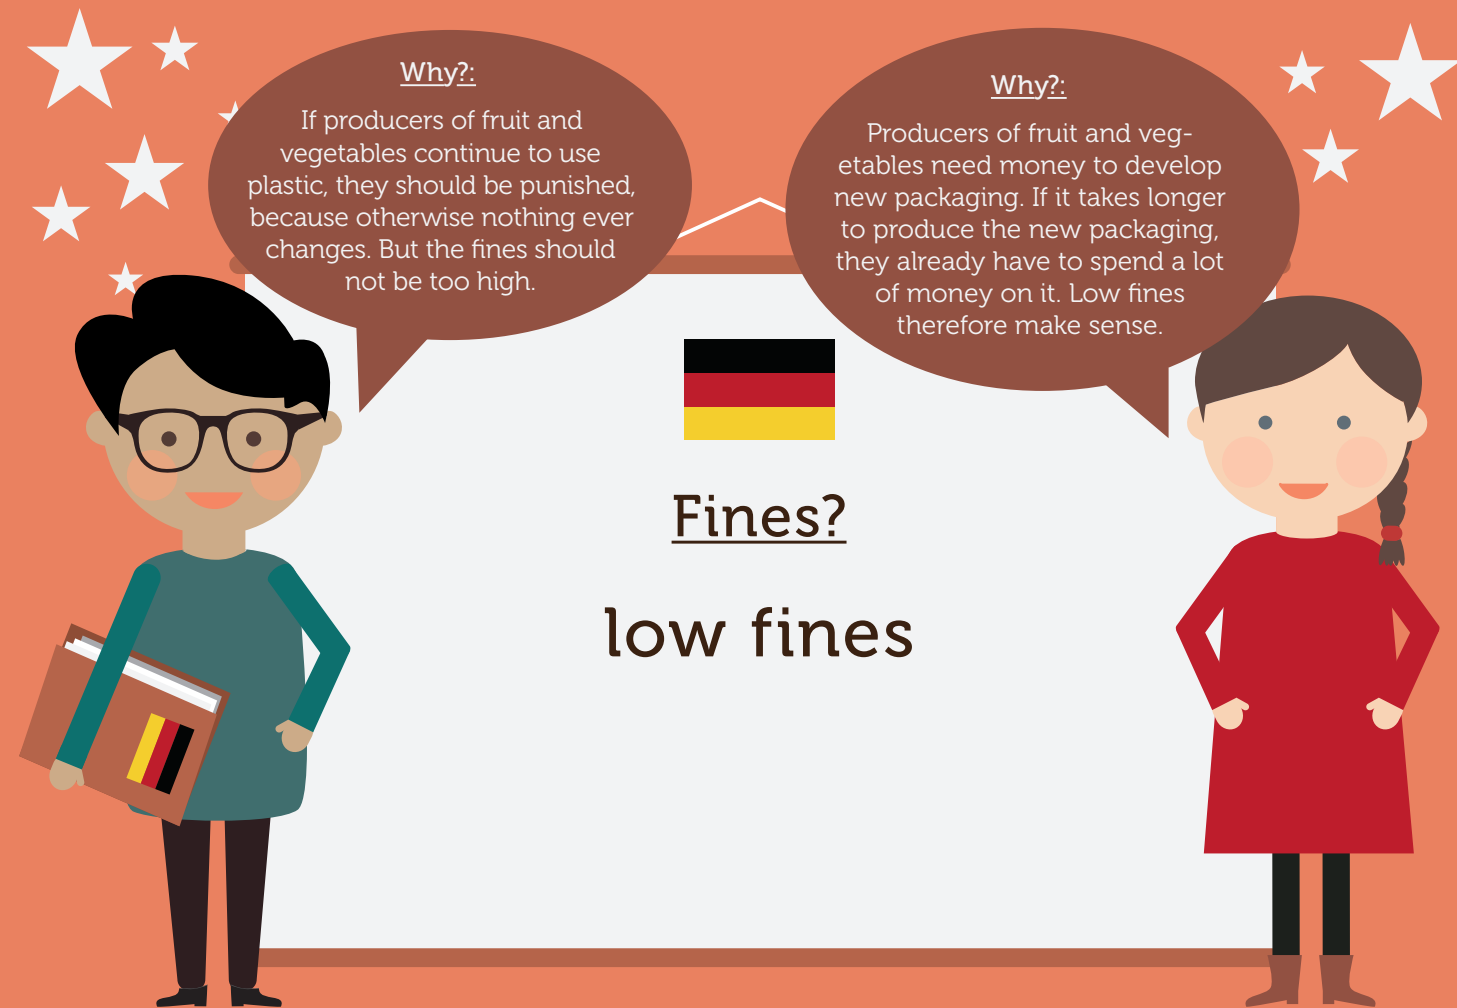

Why?:
It should be mandatory to do without plastic packaging for fruit and vegetables. Otherwise, many will just carry on as before and use plastic.

Can or must?

must

Why?:
It is important that we use less plastic in Europe. We generate a lot of waste, which is not good! That is why the law should be mandatory.

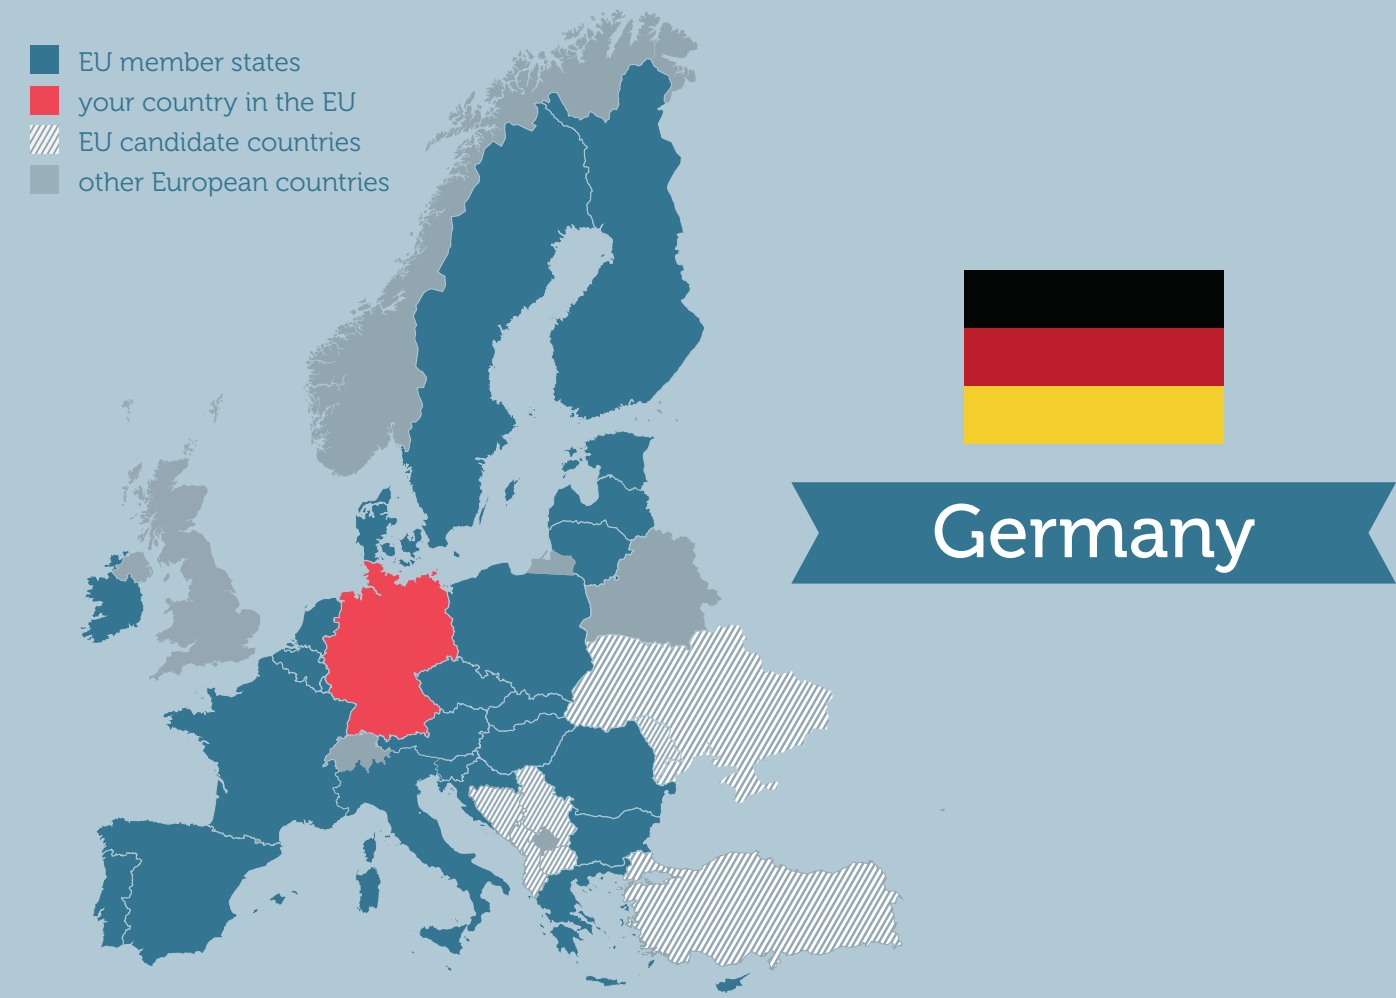

Why?:
If producers of fruit and vegetables continue to use plastic, they should be punished, because otherwise nothing ever changes. But the fines should not be too high.

Fines?

low fines

Why?:
Producers of fruit and vegetables need money to develop new packaging. If it takes longer to produce the new packaging, they already have to spend a lot of money on it. Low fines therefore make sense.

WASTE PER PERSON: a lot

National plastic ban

EXISTS IN THE COUNTRY: no

Why?:

It is important that we use less plastic. That is why we should stop wrapping fruit and vegetables in it.

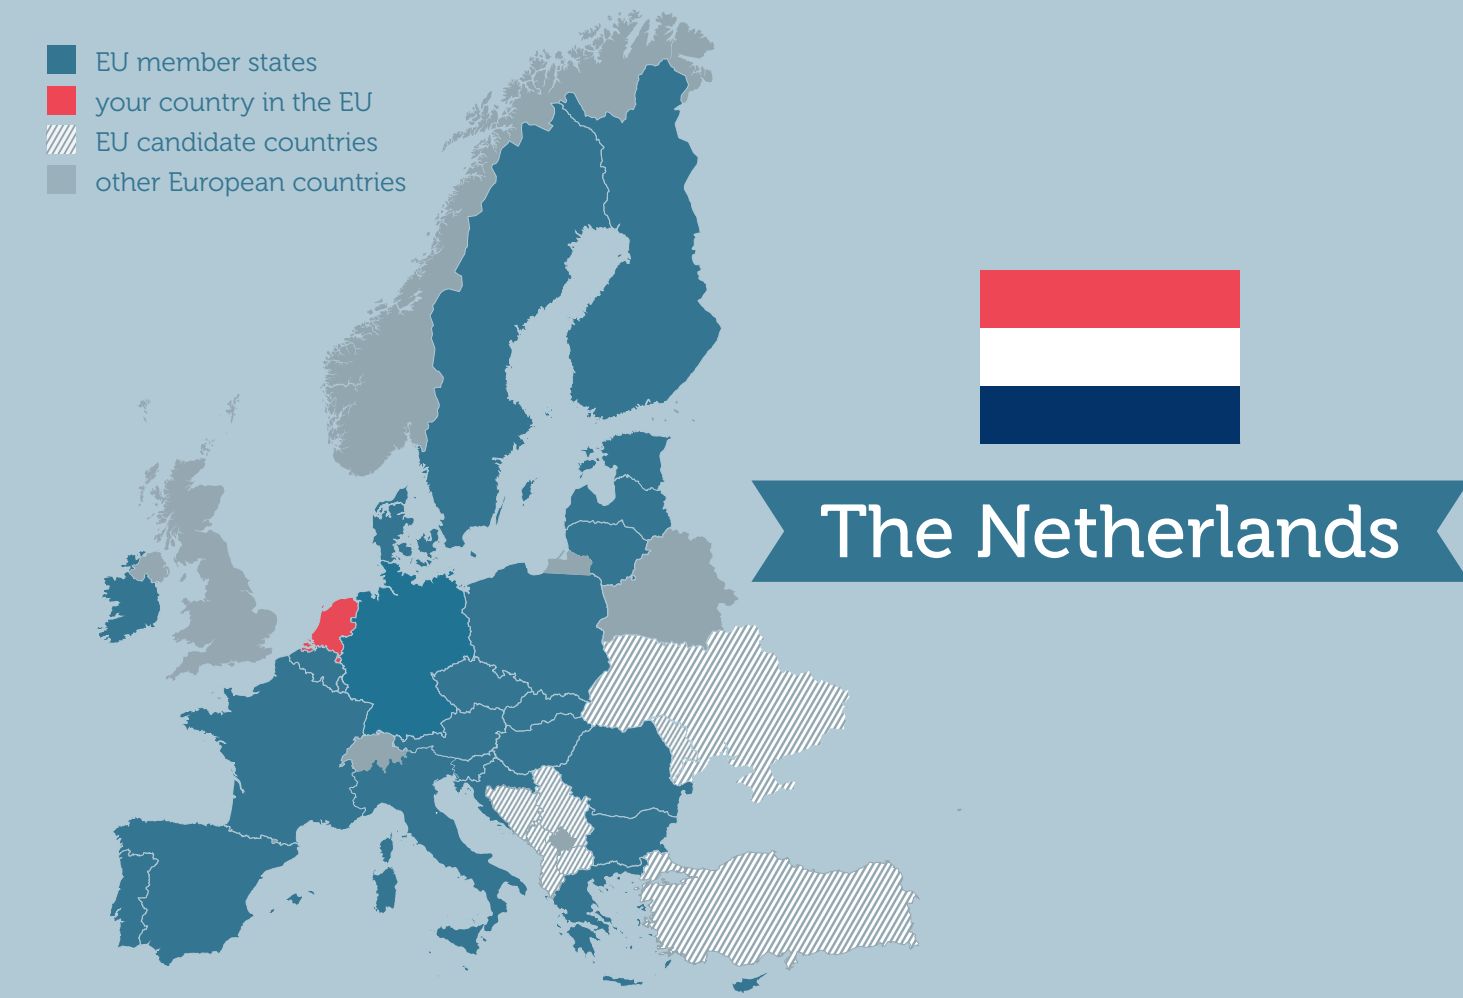

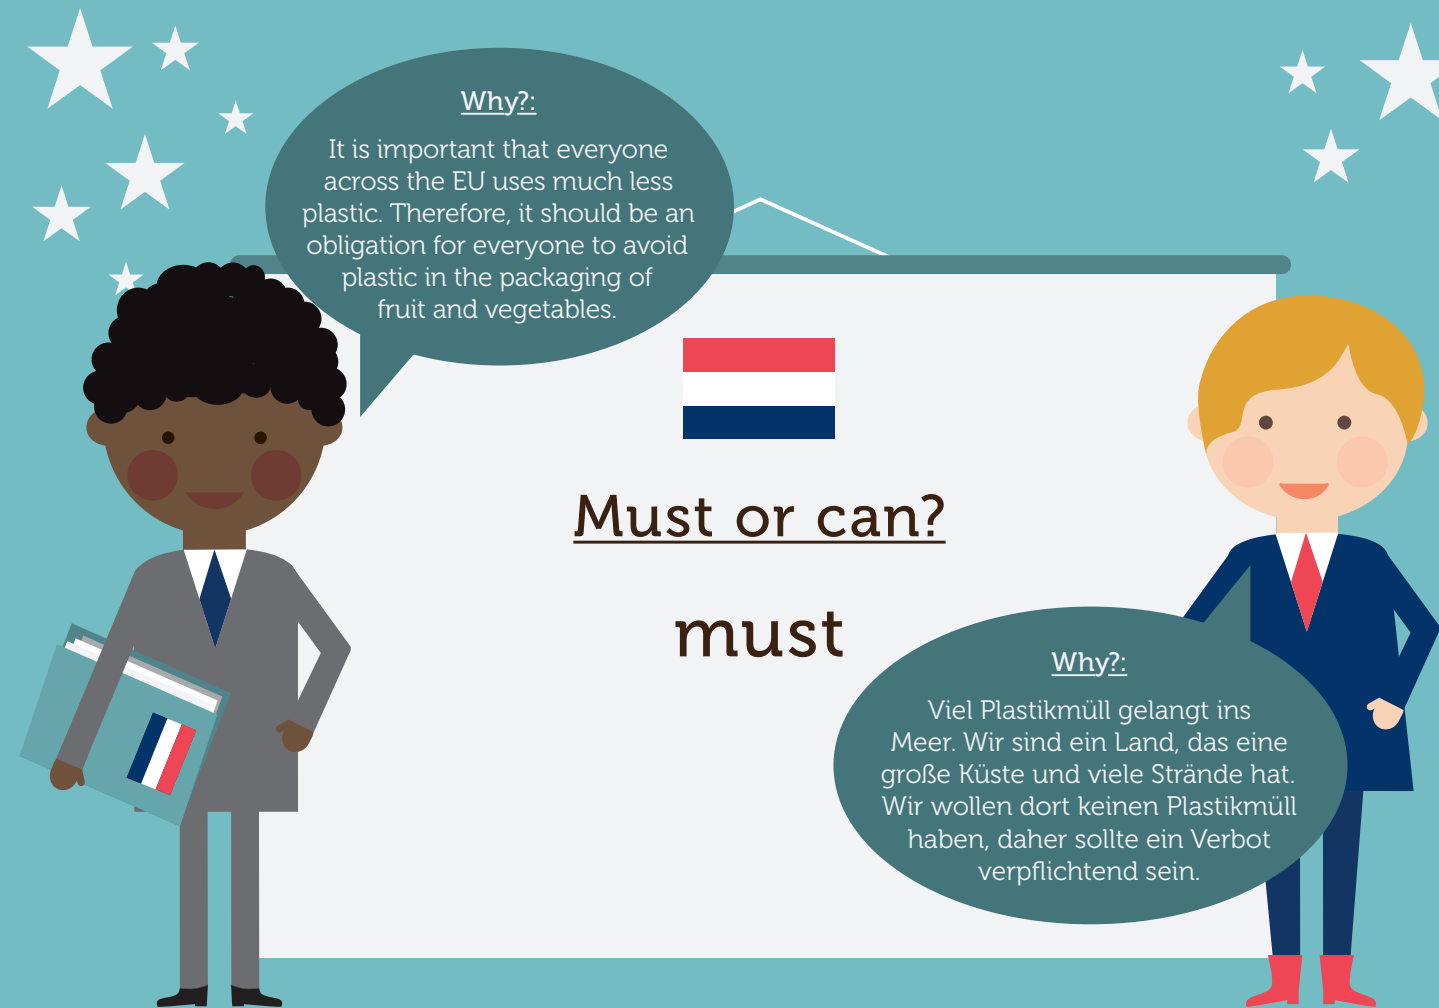

Why?:

Fruit and vegetables in plastic often last longer. We therefore need to take time so that we can look for alternative types of packaging.

Plastic consumption

WASTE PER PERSON: medium

National plastic ban

EXISTS IN THE COUNTRY: no

Why?:

Fruit and vegetables packed in plastic often last longer. In the Netherlands, we try to prevent food from being thrown away. Banning all plastic packaging is therefore not a wise move anytime soon.

Why?:

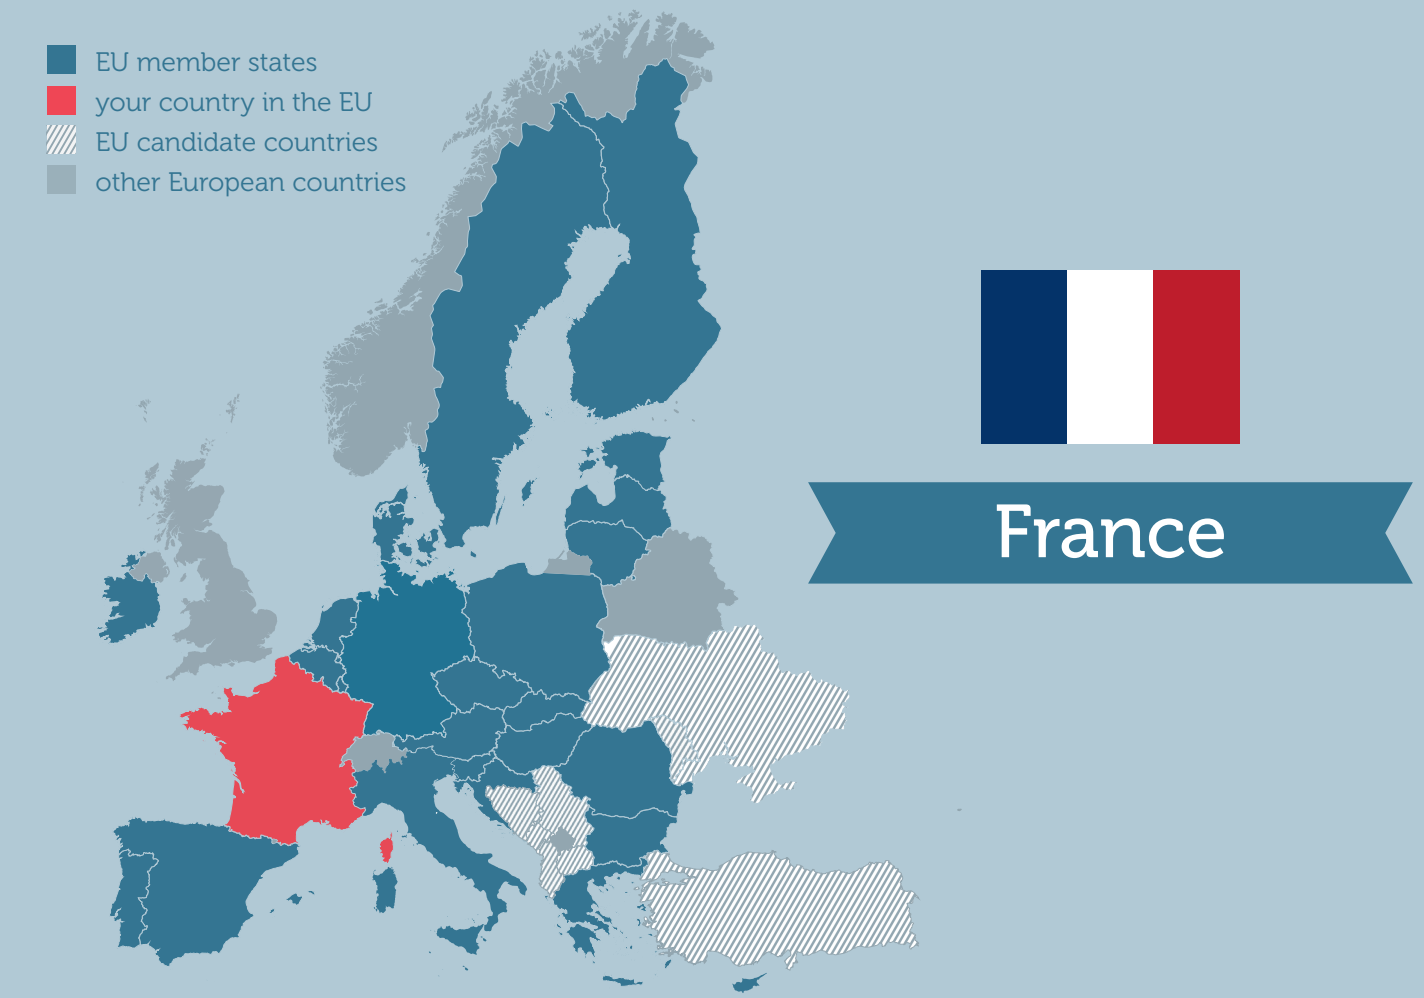

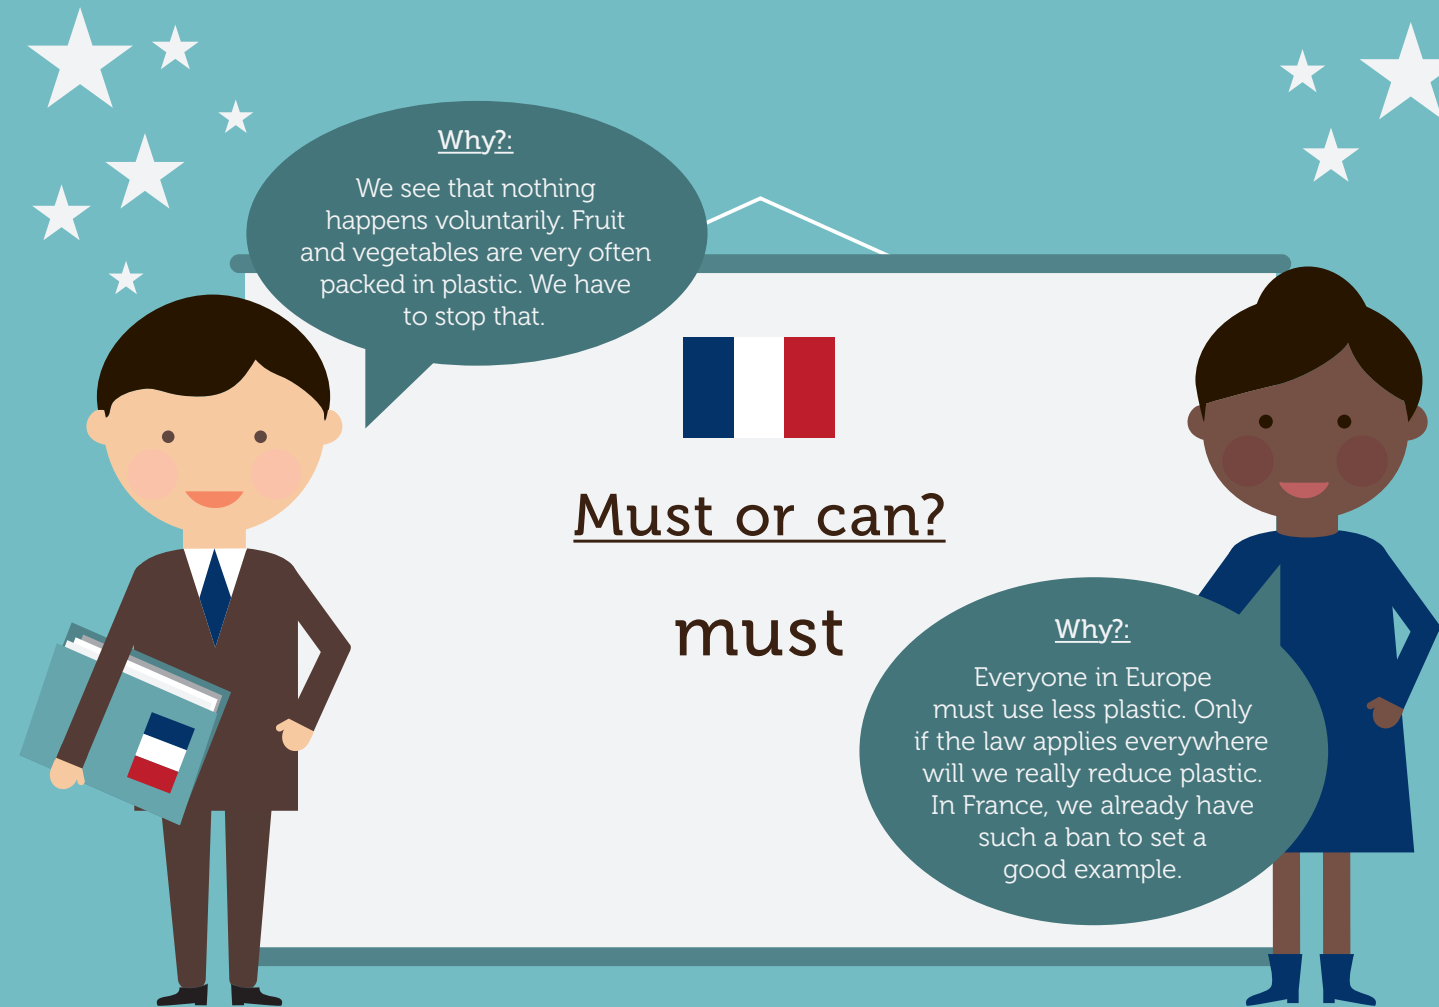

We need to find alternatives to plastic! We need time to find other materials to wrap them in.

Plastic consumption

WASTE PER PERSON: a lot

National plastic ban

EXISTS IN THE COUNTRY: yes

Why?:

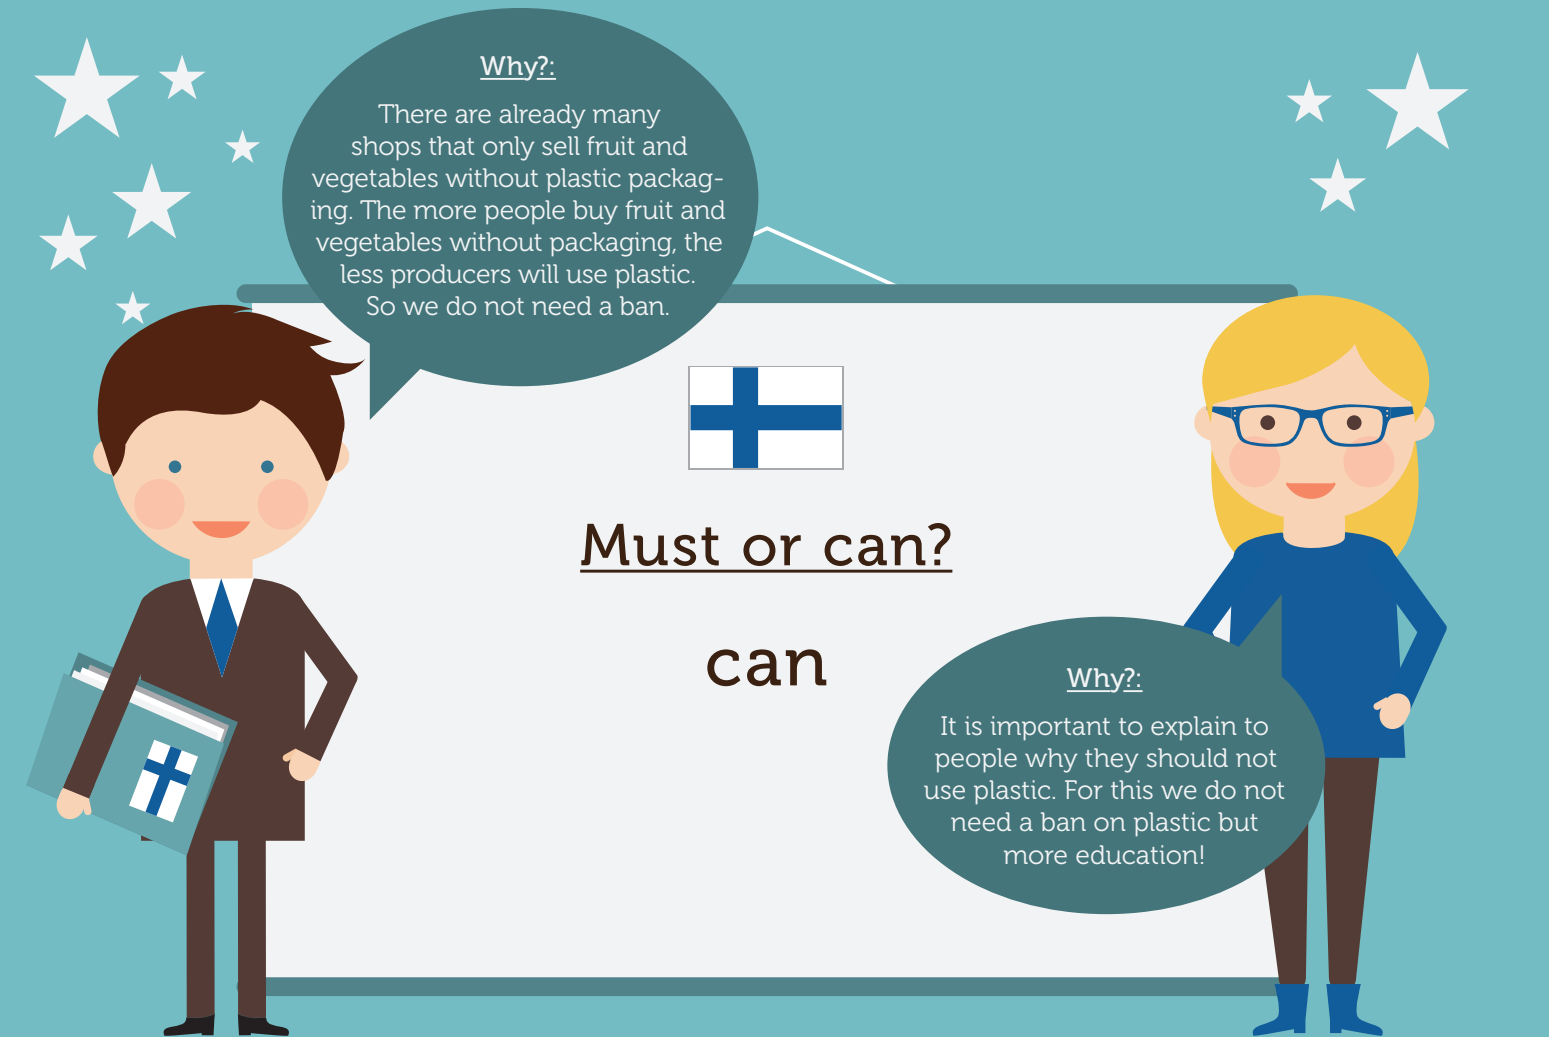

A lot of the fruit and vegetables we sell are wrapped in plastic. This often ends up in the environment and pollutes our planet. We therefore need to ban plastic as soon as possible!

Why?:

More and more companies have ideas on how to package fruit and vegetables without plastic. There are many that use paper, for example. It is much more environmentally friendly and can be quickly introduced!

When?
this year

Why?:

There are already many shops that only sell fruit and vegetables without plastic packaging. The more people buy fruit and vegetables without packaging, the less producers will use plastic. So we do not need a ban.

Must or can?

can

Why?:

It is important to explain to people why they should not use plastic. For this we do not need a ban on plastic but more education!

Why?:

If producers of fruit and vegetables decide to use plastic, they should pay a fine. We can use the money to do something for the environment.

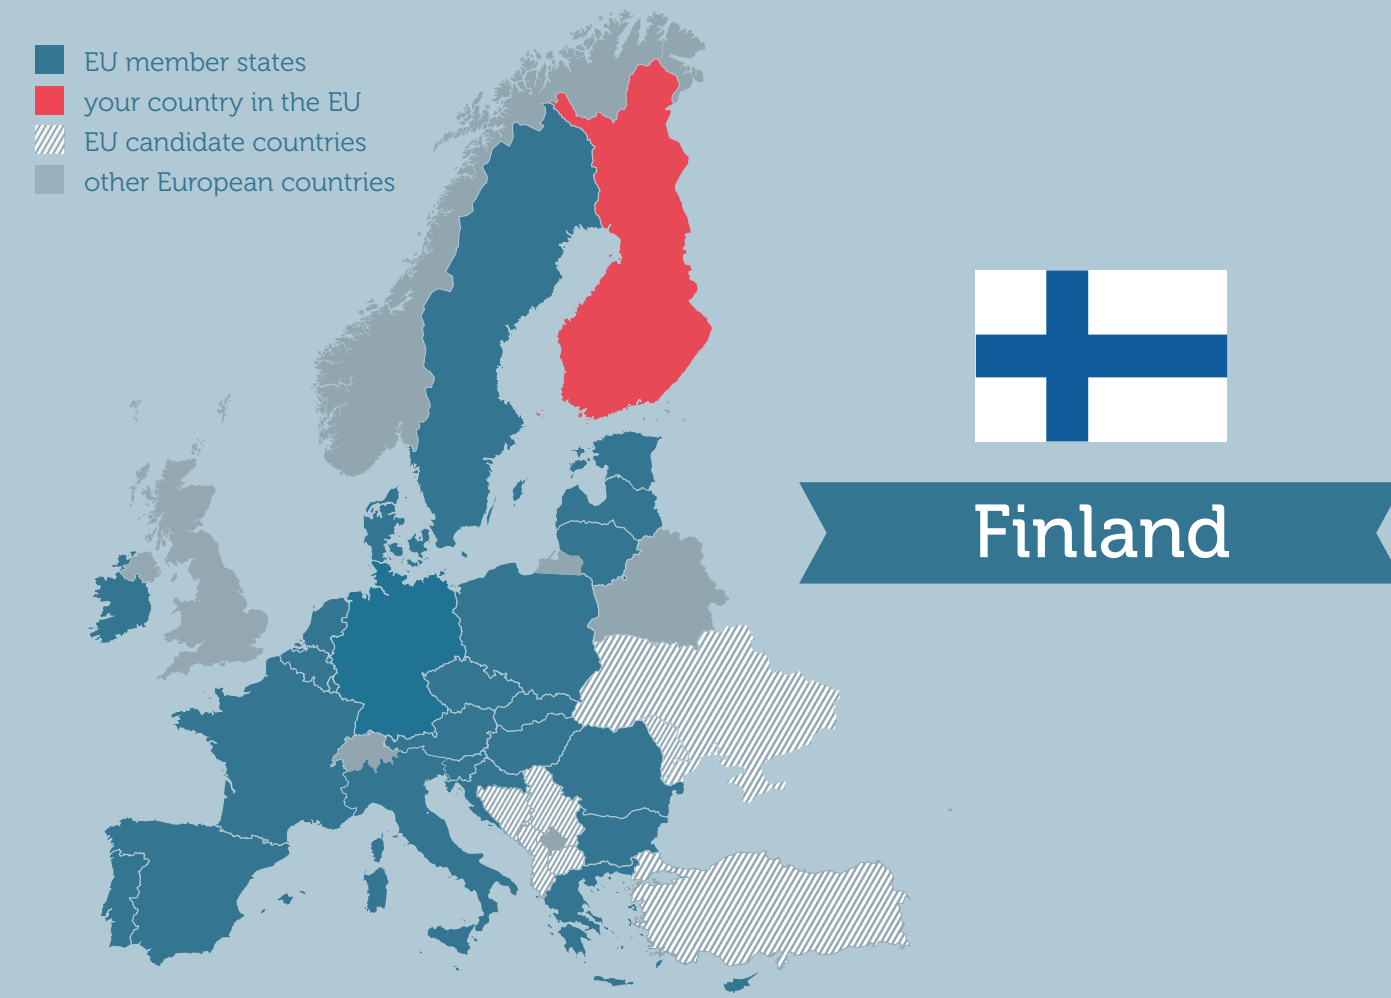

Fines?

low fines

Why?:

Fines should not be so harsh. If producers of fruit and vegetables do pack their goods in plastic, they should not go out of business because of the fines. That helps no one!

Plastic consumption

WASTE PER PERSON: little

National plastic ban

EXISTS IN THE COUNTRY: no

Why?:

We should not rush things. All fruit and vegetable producers need time to adjust. We have to give them that time.

Why?:

Plastic is used in very many areas of life. We want to change that in Finland and we are on the right track. Fruit and vegetable packaging is not so important, we should focus on other areas.

When?

in five years

Why?:

In Greece, many people buy fruit and vegetables at the market. There is little plastic packaging here. But this is not the case in other countries, which is why we need a ban throughout the EU.

Must or can?

must

Why?:

We have a responsibility towards nature and our environment. We have to reduce the consumption of plastic, and it needs to be mandatory!

Why?:

Producers of fruit and vegetables now have to think about how they can package their food differently. This costs money. If it takes them longer, we shouldn't also demand high fines, then companies could go broke.

Fines?

low fines

Why?:

If we do not have fines, many simply will not follow the rules. We should not allow that to happen. However, fines should not be too high.

WASTE PER PERSON: little

National plastic ban

EXISTS IN THE COUNTRY: no

When?

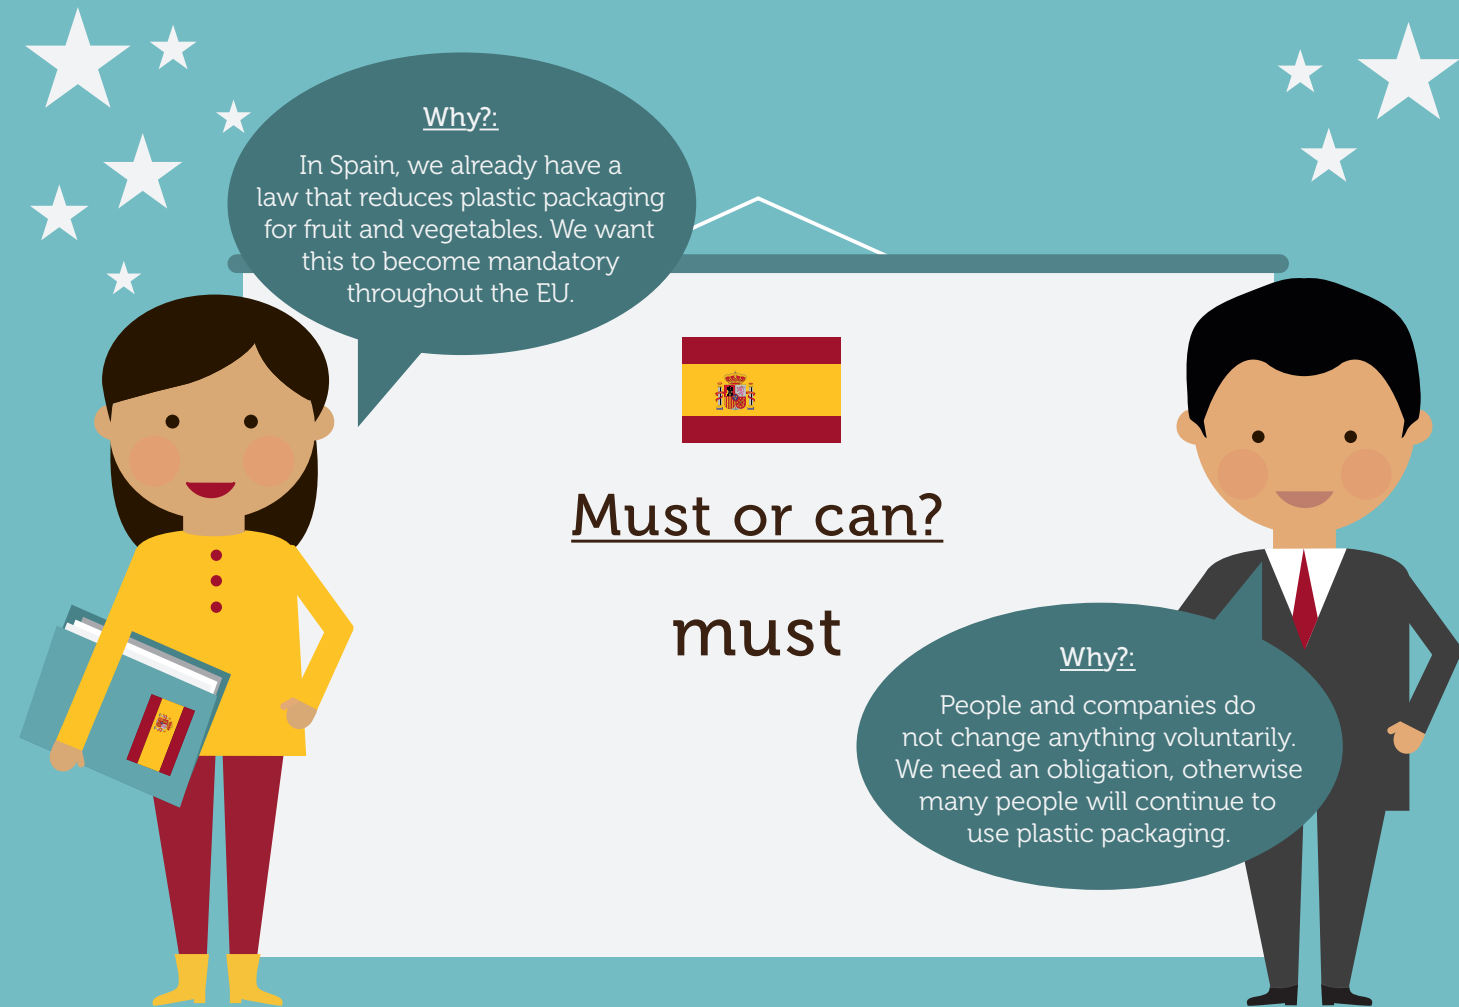

in two years

Why?:

It is important that we do something to protect the environment. Therefore, we should avoid plastic, but that takes time.

Why?:

We in Romania already use quite little plastic. So for us, this problem is not so urgent. We can wait a bit before it needs a law.

Why?:
In Spain, we already have a law that reduces plastic packaging for fruit and vegetables. We want this to become mandatory throughout the EU.

Must or can?

must

Why?:
People and companies do not change anything voluntarily. We need an obligation, otherwise many people will continue to use plastic packaging.

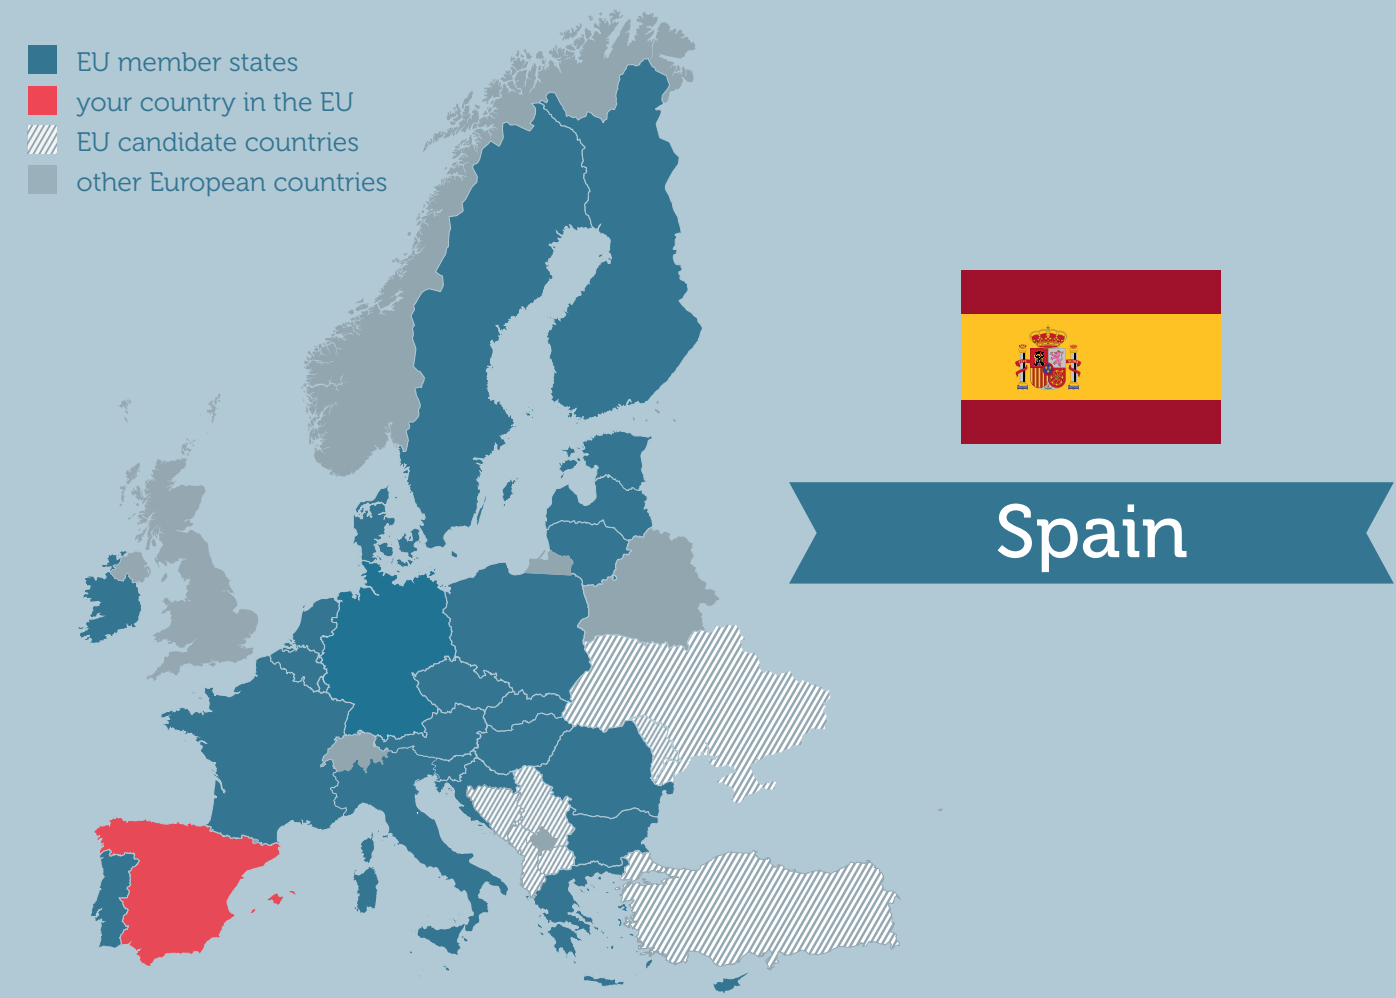

Why?:
Laws are made to be obeyed. If someone does not, there must be a fine.

Fines?

high fines

Why?:
The fine should be high: Then every producer of fruit and vegetables will really make an effort to comply with the law.

Plastic consumption

WASTE PER PERSON: a lot

National plastic ban

EXISTS IN THE COUNTRY: yes

Why?:

It is very bad for the environment that we use so much plastic. Fruit and vegetables in particular do not need to be packed in plastic. We have to change that quickly!

Why?:

In Spain, there are many people who buy cut fruit in the supermarket. Unfortunately, this is often packed in plastic. We need a little time to think of an alternative for this.
